3. Summary and Recommendations

The Fall 2025 semester showed strong improvement across all metrics. CS 310 (Machine Learning) achieved the highest pass rate at 93.8%, reflecting the updated curriculum introduced by Prof. Johansson. CS 210 (Algorithms) had the lowest pass rate at 82.8%; we recommend additional TA office hours and supplemental workshops for this course in Spring 2026.

Key recommendations:

- Expand tutoring center hours for CS 210 and CS 301.
- Pilot a peer mentorship program pairing CS 450 capstone students with CS 101 enrollees.
- Introduce formative assessments in CS 102 to identify at-risk students earlier.
- Continue the revised Machine Learning curriculum and consider extending it to a two-semester sequence.
